Spinach	24 - 25
Tomatoes	26 - 27

VEGETABLES - PROCESSING

ANNUAL SUMMARY

1965

Production in the United States of the 10 principal vegetable crops grown for commercial processing totaled 8,338,830 tons in 1965, according to the Crop Reporting Board. This year's combined production is 3 percent more than the tonnage processed in 1964 and 5 percent more than the 1959-63 average. However, the 1965 tonnage is 11 percent less than the record large 1962 production for processing. Production estimates include tonnage from mature acreage not harvested in a normal manner because of economic factors.

A larger tonnage was produced in 1965 for most vegetable crops than the previous year. Crops with a larger tonnage this year than in 1964 are: cabbage for kraut, up 41 percent; green peas, up 24 percent; green lima beans, up 20 percent; snap beans, up 14 percent; sweet corn, up 10 percent; and cucumbers for pickles, up 4 percent. Those crops which a decrease in production from 1964 are: spinach, down 15 percent; asparagus, down 6 percent; tomatoes, down 4 percent; and beets for canning, down 2 percent.

Yields for the U. S. for processing vegetables averaged above 1964 for all 10 crops except spinach which was unchanged from a year earlier. Record large yields were obtained for beets, cabbage for kraut, green peas, and tomatoes. Sweet corn yields equaled the record high established in 1963.

Prices in 1964 and 1965 for processing vegetable crops are not strictly comparable with earlier years. Beginning in 1964, the price used in determining the crop value is the per unit value at the processing plant door. Prior to 1964, the price was based on the average price at first receiving point. The 1965 value of all vegetables processed totaled \$400,846,000, up 15 percent from a year earlier.

Data on the 5 leading States in acreage harvested, production, and value of vegetables grown for freezing and canning in 1965 are as follows:

LEADING PROCESSING VEGETABLE STATES IN 1965

Rank	Acreage Harvested		Production		Value	
	State	Percent of U.S. total	State	Percent of U.S. total	State	Percent of U.S. total
1	Wisconsin	17.0	California	32.1	California	33.3
2	California	12.6	Wisconsin	9.4	Wisconsin	8.8
3	Minnesota	9.6	Ohio	7.0	Washington	6.7
4	Washington	8.6	Minnesota	5.2	Oregon	6.4
5	Illinois	6.8	Illinois	5.0	New Jersey	5.5

This report is made possible through the cooperation of vegetable processors who provided basic statistics concerning their operations.
